RE: Phase II MS4 Annual Report Transmittal for Blue Mound, Texas
TPDES Authorization: TXR040599

Dear Team Leader:

This letter serves to transmit the required annual report for the Texas Pollutant Discharge Elimination System Small Municipal Separate Storm Sewer System General Permit, Authorization Number TXR040599 for Blue Mound, Texas

The annual report is for Year 3. The reporting period's beginning January 1, 2021 and ending December 31, 2021.

A separate Notice of Change has not been submitted based on the fact that changes have not been proposed for the next permit year.

As required by the general permit, a copy of the report has been mailed to the TCEQ's regional office 4 in Fort Worth, Texas

Sincerely,

Darlene Copeland

Darlene Copeland
City of Blue Mound Mayor

Phase II (Small) MS4 Annual Report Form

TPDES General Permit Number TXR040000

A. General Information

Authorization Number: TXR040599

Reporting Year (year will be either 1, 2, 3, 4, or 5): 3

Annual Reporting Year Option Selected by MS4:

Calendar Year: X

Permit Year: _____

Fiscal Year: _____ Last day of fiscal year: (_____)

Reporting period beginning date: (month/date/year) 01/01/2021

Reporting period end date: (month/date/year) 12/31/2021

MS4 Operator Level: 1 Name of MS4: City of Blue Mound

Contact Name: Joey Alvarez Telephone Number: 817-306-4619

Mailing Address: 1817 Fagan Dr. Blue Mound, TX 76131

E-mail Address: jalvarez@bluemoundtexas.us

A copy of the annual report was submitted to the TCEQ Region: YES x

NO Region the annual report was submitted to: TCEQ Region 4

B. Status of Compliance with the MS4 GP and SWMP

1. Provide information on the status of complying with permit conditions:
(TXR040000 Part IV.B.2)

	Yes	No	Explain
Permittee is currently in compliance with the SWMP as submitted to and approved by the TCEQ.	X		BMPs have been met or progress has been made toward being met.
Permittee is currently in compliance with recordkeeping and reporting requirements.	X		Report being submitted for 2021.

Permittee meets the eligibility requirements of the permit (e.g., TMDL requirements, Edwards Aquifer limitations, compliance history, etc.).	X		The permittee meets the eligibility requirements.
Permittee conducted an annual review of its SWMP in conjunction with preparation of the annual report	X		The permittee reviewed the SWMP.

2. Provide a general assessment of the appropriateness of the selected BMPs. You may use the table below to meet this requirement (**see Example 1 in instructions**):

MCM(s)	BMP	BMP is appropriate for reducing the discharge of pollutants in stormwater (Answer Yes or No and explain)
1	1.1 Bulk Trash Pick-up Day	Yes, inviting residents and business to participate in bulk trash pickup day reduces trash from getting into drainageways. The City provides this service to all residents monthly (12 times annually).
2	2.1 Storm Drainage System Map	Yes, the City's storm drain system map is used to track reported discharges and determine target areas in need of education and/or enforcement.
2	2.3 Public Reporting and Response Procedures	Yes, providing avenues for the public to report stormwater runoff, illicit discharges and illegal dumping aids City staff in identifying and addressing these issues. The City maintains this information on its website.
5	5.2 Municipal Employee Training Program	Yes, training staff on pollution prevention for stormwater provides a better understanding of the need for good housekeeping practices and the importance of protecting the City's stormwater resources.

5	5.3 Municipal Operation and Maintenance Activities	Yes, developing and implementing pollution control measures for O&M activities gives the City the opportunity to identify potential sources of pollution and mitigate those sources.
---	---	--

3. Describe progress towards achieving the goal of reducing the discharge of pollutants to the MEP. If no progress was made or the BMP did not result in a reduction in pollutants, provide an explanation. Use the table below to meet this requirement (**see Example 2 in instructions**):

MCM	BMP	Information Used	Quantity	Units	Does the BMP Demonstrate a Direct Reduction in Pollutants? (Answer Yes or No and explain)
1	1.1 Bulk Trash Pick-up Day	Bulk Trash Pick-up Day	1	Web page	Yes. Pickup of bulk trash on the first Thursday of every month gives residents a convenient way to properly dispose of bulk trash, thereby reducing pollutants from getting into drainageways and streams.
1	1.2 Site Construction Waste Management Guideline	Interview with Public Works Director	N/A	N/A	Yes. Providing this information to contractors educates them on the City's requirements to protect stormwater quality and helps reduce discharge of pollutants.

1	1.3 Stormwater Month	"Prevent Stormwater Pollution" flyer	1	Flyer	Yes. Educating the public on how to properly dispose of trash, pet waste, landscape waste, and fats, oils and greases reduces the likelihood of stormwater pollution.
1	1.4 Water Conservation Practices for Homeowners	"Save our Place, Save our Water" flyer	1	Flyer	Yes. The information educates the public on water conservation measures that impact stormwater quality.
1	1.5 Display SWMP and Annual Reports on the Public Works Web Page	NCTCOG educational material	1	Web page	Yes. Posting the SWMP educates citizens on stormwater issues and the importance of protecting against pollution.
2	2.1 Storm Drainage System Map	Storm Drainage Map	1	Map	No. A map of storm drain locations and outfalls does not directly reduce pollutants. The map allows City staff to identify potential points of discharge when responding to reported concerns.
2	2.2 Education and Training on Illicit Discharges	NCTCOG training materials	1	Web page	Yes. Training trains employees to identify pollution and understand how to respond to reduce the impacts of illicit discharges.

2	2.3 Public Reporting and Response Procedures	Public concerns	N/A	N/A	Yes. Having a procedure for the public to report concerns and for the City to respond to reports reduces the likelihood of pollution going unnoticed and untreated.
2	2.4 Source Investigation and Elimination	Site visits	0	Concerns reported	Yes. Site visits to investigate potential illicit discharges directly reduce pollutants by reducing the likelihood of pollution going unnoticed and untreated.
3	3.1 Erosion and Sediment Control Requirements	City of Blue Mound Code of Ordinances Article 13 Division 2	0	UDC Revisions	Yes. It does give the City the ability to enforce measures designed to reduce erosion.
3	3.2 Construction Plan Review Procedures	Plans	0	Permit reviews	Yes. These interactions provide City staff the opportunity to educate developers/contractors on the City's requirements to protect stormwater quality.
3	3.3 Construction Site Inspection and Enforcement	Construction	0	Projects	Yes. Site inspections allow for corrections to be made in a timely manner that reduce pollutants in the stormwater system.

3	3.4 Construction Stormwater Training	NCTCOG material	1	Web page	Yes. Educating staff does help staff identify potential pollution and how to respond.
4	4.1 Post-Construction Ordinance	Article 13 Division 4	0	Enforcement Actions	Yes. It does give the City the ability to enforce measures designed to reduce erosion.
4	4.2 Long-Term Maintenance of Post-Construction BMPs	Requirements for Long-Term Maintenance	N/A	N/A	Yes. Long-term maintenance of post-construction BMPs ensures the BMP continues to reduce pollution.
5	5.1 Facility and Stormwater Control Inventory	List of City-owned and operated facilities and stormwater controls	4	Facilities	Yes. Maintaining a list of City-owned and operated facilities and stormwater controls helps City staff locate potential pollutants within its facilities.
5	5.2 Municipal Employee Training Program	NCTCOG material	1	Web page	Yes. Educating staff on good housekeeping practices improves understanding of the importance of protecting the City's stormwater system and ways to reduce discharge pollutants.
5	5.4 Municipal Operation and Maintenance Activities	Municipal operations and activities	1 1	List Invoice	Yes. Educating City staff on municipal O&M activities and performing site inspections does reduce pollutants.

4. Provide the measurable goals for each of the MCMs, and an evaluation of the success of the implementation of the measurable goals (**see Example 3 in instructions**):

MCM(s)	Measurable Goal(s)	Explain progress toward goal or how goal was achieved. If goal was not accomplished, please explain.
1	BMP 1.1 - Monthly 2021-2023: 12 bulk trash pick-up events will be held each permit year.	Met goal. The City offers monthly bulk trash pickup on the first Thursday of every month. A flyer with information about this service is given to every new water customer when they sign up.
1	BMP 1.2 – Monthly 2021-2023: Provide educational materials to contractors at 100% of preconstruction meetings Monthly 2021-2023: Provide educational materials to 100% of contractors pulling building permits	Progress towards goal. There has been no construction activity requiring construction site erosion control during the report period. The City will provide such information to all contractors per goal.
1	BMP 1.3 - October Annually 2021-2023: Display 1 educational flyer on the board outside of City Hall. Make 2 educational social media posts during Stormwater Month	Did not meet goal. The City made these postings during Stormwater Month in 2021. Gave flyers but no official month
1	BMP 1.4 - Annually 2021-2023: Provide flyers to 100% of water customers through the Consumer Confidence Report.	Did not meet goal. The City will provide flyers to water customers annually through the Consumer Confidence Report.
1	BMP 1.5 - April Annually 2021-2023: Post the SWMP and annual reports as they are submitted to TCEQ on the City’s Public Works Website.	Did not meet goal. The City plans to post the SWMP and annual reports in April 2022.

2	BMP 2.1 - December Annually 2021-2023: Update map each calendar year to ensure that 100% of outfall locations are included.	Progress towards goal. The City mapped their storm drainage system in 2017. There have been no changes to the storm water system since the map was created. In 2022, the City will review the map and ensure it is still accurate and useful.
2	BMP 2.2 - December 2021-2023: Provide training for 100% of the city staff on illicit discharge detection and elimination annually.	Progress towards goal. The City has a list of staff to train. They will purchase training material from NCTCOG and train employees.
2	BMP 2.3 - Monthly 2021-2023: Post a public reporting/input phone number and information on the City website with a central contact point. Document 100% of complaints and reports received, and any corrective actions taken.	Met goal. The City has a phone number and contact listed on its website for the public to report concerns. In 2022, they will update the contact on their website. All complaints will continue to be documented.
2	BMP 2.4 - September Annually 2021-2023: Inspect 50% of 12 outfalls each calendar year during dry weather conditions	Did not meet goal. The City plans to implement this goal annually in September.
3	BMP 3.1 - December annually 2021-2023: Review Erosion Sediment Control ordinance once per calendar year and revise ordinances as needed.	Did not meet goal. The City plans to implement this goal annually in December.

3	<p>BMP 3.2 - December Annually 2021-2023: Require SWPPPs for 100% of constructions projects greater than 1 acre. Review 100% of all construction project SWPPPs to ensure that they are in compliance with Blue Mound Ordinance. Document 100% of SWPPPS reviewed by Blue Mound each calendar year.</p>	<p>Progress towards goal. No permit reviews were conducted in the past five years.</p> <p>The City will meet this goal with all construction projects requiring SWPPPs.</p>
3	<p>BMP 3.3 - December annually 2021-2023: Review and update the procedures, schedule, and checklist each calendar year.</p> <p>December annually 2021-2023: Implement and enforce the existing ordinance by conducting construction inspections on 100% of sites on a bimonthly basis during active construction.</p>	<p>Progress towards goal. No inspections or enforcements in the past five years.</p> <p>The City will meet this goal each year and enforce existing ordinance for all new construction sites.</p>
3	<p>BMP 3.4 - December annually 2021-2023: Each calendar year, ensure 100% of Blue Mound inspectors are trained in procedures for ensuring that construction sites have the required stormwater runoff controls</p>	<p>Progress towards goal. The City has a list of staff to train. They will purchase training material from NCTCOG and train employees.</p>
4	<p>BMP 4.1 - December annually 2021-2023: Enforce the existing ordinance to provide corrective actions and penalties for 100% of actionable violations each calendar year. Review 100% of ordinances and updates as state policy and local practices necessitate.</p>	<p>Met goal. No enforcement actions were required in 2021.</p> <p>The City will continue to review and provide corrective actions as necessary for all violations.</p>

<p>4</p>	<p>BMP 4.2 - December 2021: Research and develop procedures, schedule and checklist for inspection of post-construction stormwater management control measures by December 2021</p> <p>December annually 2022-2023 Develop an inventory of control measures requiring regular inspection by December 2022. Review and update inventory each December. Inspect 50% of control measures each calendar year. Take corrective action on problems found during inspections within two-weeks. Document 100% of inspections and corrective actions taken each calendar year.</p>	<p>Did not meet goal. The City will meet this goal in December annually.</p>
<p>5</p>	<p>BMP 5.1 - December annually 2021-2023: Review and revise the inspection and prevention procedures to account for new sources of pollutants once per calendar year.</p> <p>December annually 2021-2023: Once each calendar year, inspect 100% of Blue Mound owned facilities and operations and identify any potential new sources of pollution. Following inspections, document any corrective action taken if needed, to ensure 100% of facilities and operations comply with pollution prevention measures identified in this SWMP.</p>	<p>Did not meet goal. The City will meet this goal in December.</p>

5	BMP 5.2 - December annually 2021-2023: Conduct training of 100% of Blue Mound employees	Progress towards goal. The City has a list of employees to train. They will purchase training material from NCTCOG, develop a schedule for training, and train employees in 2022.
5	<p>BMP 5.3 - December annually 2021-2023: Develop and maintain an inventory of 100% of municipal operations and/or activities that have the potential for pollutant discharges. Review and revise the inspection and prevention procedures to account for new sources of pollution once per calendar year.</p> <p>December annually 2021-2023: Inspect 100% of Blue Mound owned facilities and operations and identify any potential new sources of pollution. Following inspections, document any corrective action taken, if needed to ensure 100% of facilities and operations comply with pollution prevents measures identified in this SWMP.</p>	Progress towards goal. The City has identified municipal operations and/or activities that can have potential for pollutant discharges. The City will meet this goal annually in December.

C. Stormwater Data Summary

Provide a summary of all information used, including any lab results (if sampling was conducted) to assess the success of the SWMP at reducing the discharge of pollutants to the MEP. For example, did the MS4 conduct visual inspections, clean the inlets, look for illicit discharge, clean streets, look for flow during dry weather, etc.?

The Blue Mound MS4 program engaged in the following activities in the past five years:

- Had the storm drain system cleaned in 2019 to remove debris and sediment build-up.

- Continued to monitor and track public reports of stormwater issues. No public drainage reports were received that turned out to be stormwater-related concerns. The concerns were redirected to the appropriate departments.
- Continued to respond to all concerns for illicit discharges and dumping. None were reported in 2021.
- Continued to implement spill cleanup procedures at municipal facilities. None were needed in 2021,

D. Impaired Waterbodies

1. Identify whether an impaired water within the permitted area was added to the latest EPA-approved 303(d) list or the Texas Integrated Report of Surface Water Quality for CWA Sections 305(b) and 303(d). List any newly-identified impaired waters below by including the name of the water body and the cause of impairment.

No new impaired waters were added to the 303(d) list since the list was updated in 2021. The City of Blue Mound discharges to the West Fork River below Lake Worth, which is listed as Segment 0806A (Dioxin in edible tissue and PCBs in edible tissue). None of the receiving waters have at TMDL in place. The 2020 Texas 303(d) list does not include any additional impairments within the Blue Mound area. The City is aware of the impairments.

2. If applicable, explain below any activities taken to address the discharge to impaired waterbodies, including any sampling results and a summary of the small MS4's BMPs used to address the pollutant of concern.

Activities that the City of Blue Mound have taken to improve water quality in terms of dioxins and PCBs include BMPs (Bulk Trash Pickup Day, Public Reporting and Response, and the Illicit Discharge Ordinance). Since these are legacy pollutants, it can be difficult to pinpoint effective stormwater activities to fully reduce the impact to local waterways. However, the City has implemented the aforementioned BMPs to help eliminate any waste that could potentially lead to the release of dioxins and PCBs.

3. Describe the implementation of targeted controls if the small MS4 discharges to an impaired water body with an approved TMDL.

Not applicable. City of Blue Mound does not contain impaired waterbodies with an approved TMDL listed on the TCEQ 303d list.

4. Report the benchmark identified by the MS4 and assessment activities:

Not applicable. City of Blue Mound does not contain impaired waterbodies with an approved TMDL listed on the TCEQ 303d list.

5. Provide an analysis of how the selected BMPs will be effective in contributing to achieving the benchmark:

Not applicable. City of Blue Mound does not contain impaired waterbodies with an approved TMDL listed on the TCEQ 303d list.

6. If applicable, report on focused BMPs to address impairment for bacteria:

Not applicable. City of Blue Mound does not contain impaired waterbodies with an approved TMDL listed on the TCEQ 303d list.

7. Assess the progress to determine BMP's effectiveness in achieving the benchmark.

For example, the MS4 may use the following benchmark indicators:

- number of sources identified or eliminated;
- number of illegal dumpings;
- increase in illegal dumping reported;
- number of educational opportunities conducted;
- reductions in sanitary sewer flows (SSOs); /or
- increase in illegal discharge detection through dry screening.

Not applicable. City of Blue Mound does not contain impaired waterbodies with an approved TMDL listed on the TCEQ 303d list.

E. Stormwater Activities

Describe activities planned for the next reporting year:

MCM(s)	BMP	Stormwater Activity	Description/Comments
1	1.1 Bulk Trash Pick-up Day	Provide a bulk trash pick-up event monthly for citizens to encourage public participation in bulk trash removal.	The City will continue to provide monthly bulk trash service to City residents.

1	1.2 Site Construction Waste Management Guideline	Provide a guideline for contractors that educates them about proper disposal of wastes including discarded building materials, concrete truck washout water, chemical, litter, and sanitary waste at construction site.	The City will continue to provide the educational guideline to contractors and homebuilders as needed.
1	1.3 Stormwater Month	Continue to have October as a recognized Stormwater Month to provide education about various stormwater issues including trash, pet waste, landscape practices, and fats oils and grease.	The City will hold Stormwater month to help recognize the importance of stormwater pollution prevention.
1	1.4 Water Conservation Practices for Homeowners	Distribute water conservation tips to all water customers once per year in the Consumer Confidence Report.	The City will give water conservation tips to residents in order to reduce water consumption, therefore, reducing runoff.
1	1.5 Display SWMP and Annual Reports on the Public Works Web Page	Display the SWMP and annual reports on the Public Works Web Page for the public to view.	The City will display the SWMP and Annual Reports online.
2	2.1 Storm Drainage System Map	Annually update the storm drainage system map using record drawings submitted for any new development or redevelopment projects.	The City will review and update the map as needed.

2	2.2 Education and Training on Illicit Discharges	Education and training on illicit discharges for City staff.	The City will choose materials and methods to train staff in illicit discharge detection education and conduct training.
2	2.3 Public Reporting and Response Procedures	Provide a public reporting/input mechanism for receipt and consideration of information submitted by the public concerning construction site stormwater runoff, illicit discharges or illegal dumping.	The City will continue to make the public reporting number available to residents and document any report/calls received. They will update the contact on their website.
2	2.4 Source Investigation and Elimination	Develop inspection and investigation procedures to identify and locate the source of any reported illicit discharges. Develop procedures for addressing the source of an illicit discharge including corrective actions upon source determination, follow-up investigations and dry weather screening, as appropriate.	The City will continue to document any reports and responses and perform investigations if warranted.
3	3.1 Erosion and Sediment Control Requirements	Develop erosion and sediment control requirements for regulated construction activities to include implementation of erosion and sediment controls, soil stabilization and BMPs. Develop a list of prohibited discharges from construction activities to be included in the erosion and sediment control ordinance.	The City will continue to review the ordinances. and make any changes necessary.

3	3.2 Construction Plan Review Procedures	Develop improved construction plan review procedures to evaluate proposed erosion and sediment controls in accordance with the City's construction erosion and sediment control ordinance.	The City will continue to review and amend existing construction plan review procedures.
3	3.3 Construction Site Inspection and Enforcement	Develop improved construction site inspection and enforcement procedures to ensure the proper installation and maintenance of erosion and sediment controls on regulated construction projects.	The City will continue to review and amend the existing procedures if needed. They will conduct inspections or enforcement if necessary.
3	3.4 Construction Stormwater Training	Implement and track the training program for designated employees.	The City will provide construction stormwater training for designated employees.
4	4.1 Post- Construction Ordinance	Continue to administer the existing post construction runoff ordinance. Document and maintain enforcement actions.	The City will review the ordinance and update as needed.
4	4.2 Long- Term Maintenance of Post- Construction BMPs	Develop requirements for the long-term operation and maintenance of structural controls installed on development sites.	The City will hold a training program for the designated city staff and document with attendance signatures.
5	5.1 Facility and Stormwater Control Inventory	Develop requirements for long-term maintenance of post-construction BMPs that are installed on new development and re-development projects.	The City will continue to maintain a list of City-owned and operated facilities.

5	5.2 Municipal Employee Training Program	Implement the municipal employee training program and maintain a training attendee list with signatures.	The City will hold a training program for the designated city staff and document with attendance signatures.
5	5.3 Municipal Operation and Maintenance Activities	Perform an assessment of municipal operations and/or activities that have the potential for pollutant discharges. Develop pollution prevention measures for municipal O&M activities and select inspection frequencies.	The City will develop pollution prevention measures for municipal O&M activities and select inspection frequencies.

F. SWMP Modifications

1. The SWMP and MCM implementation procedures are reviewed each year.

Yes No

2. Changes have been made or are proposed to the SWMP since the NOI or the last annual report, including changes in response to TCEQ's review.

Yes No

If "Yes," report on changes made to measurable goals and BMPs:

No changes are requested at this time.

MCM(s)	Measurable Goal(s) or BMP(s)	Implemented or Proposed Changes (Submit NOC as needed)
N/A	N/A	N/A

Note: If changes include additions or substitutions of BMPs, include a written analysis explaining why the original BMP is ineffective or not feasible, and why the replacement BMP is expected to achieve the goals of the original BMP.

3. Explain additional changes or proposed changes not previously mentioned (i.e. dates, contacts, procedures, annexation of land, etc.).

No changes are proposed at this time.

G. Additional BMPs for TMDLs and I-Plans

Provide a description and schedule for implementation of additional BMPs that may be necessary, based on monitoring results, to ensure compliance with applicable TMDLs and implementation plans.

No additional BMPs are being added at this time.

BMP	Description	Implementation Schedule (start date, etc.)	Status/Completion Date (completed, in progress, not started)
N/A	N/A	N/A	N/A

H. Additional Information

1. Is the permittee relying on another entity to satisfy any permit obligations?

Yes No

If "Yes," provide the name(s) of other entities and an explanation of their responsibilities (add more spaces or pages if needed).

Name and Explanation: N/A

Name and Explanation: N/A

Name and Explanation: N/A

Name and Explanation: N/A

2.a. Is the permittee part of a group sharing a SWMP with other entities?

Yes No

2.b. If "yes," is this a system-wide annual report including information for all permittees?

Yes No

If "Yes," list all associated authorization numbers, permittee names, and SWMP responsibilities of each member (add additional spaces or pages if needed):

Authorization Number: _____ Permittee: _____
Authorization Number: _____ Permittee: _____
Authorization Number: _____ Permittee: _____
Authorization Number: _____ Permittee: _____

I. Construction Activities

1. The number of construction activities that occurred in the jurisdictional area of the MS4 (Large and Small Site Notices submitted by construction site operators):

[Zero notices of intent; Zero site notices](#)

- 2a. Does the permittee utilize the optional seventh MCM related to construction?

___ Yes X No

- 2b. If "yes," then provide the following information for this permit year:

The number of municipal construction activities authorized under this general permit	
The total number of acres disturbed for municipal construction projects	N/A

Note: Though the seventh MCM is optional, implementation must be requested on the NOI or on a NOC and approved by the TCEQ.

J. Certification

If this is this a system-wide annual report including information for all permittees, each permittee shall sign and certify the annual report in accordance with 30 TAC §305.128 (relating to Signatories to Reports).

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there

are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
