

# Cleaner Curbs & Cleaner Creeks for a Healthier Home

## Prevent storm water pollution at home:

- Never sweep or dump anything down storm drains.

- Reduce, reuse and recycle.

- Pick up after your pet.

- Dispose of antifreeze, paints, and other household chemicals at an HHW center.

- Dispose used oil and oil filters at recycling facilities or at a designated collection center.

- Check your car for leaks and recycle motor oil.

- Take your car to the car wash instead of washing it in the driveway.
